

Conexión de sede mediante una VPN

Para realizar una conexión entre sede tenemos que crear en cada sede una conexión VPN mediante ipsec.

Creamos la VPN en la sede central

The screenshot shows the FortiGate 620B VPN Creation Wizard. The left sidebar has a menu with 'VPN' selected. The main area shows the 'VPN Setup' step. The 'Name' field is 'vpn a central'. The 'Template' list includes 'Site to Site - FortiGate' (selected), 'Dialup - FortiClient (Windows, Mac OS, Android)', 'Dialup - IOS (Native)', 'Dialup - Android (Native L2TP/IPsec)', 'Dialup - Cisco Firewall', 'Site to Site - Cisco', and 'Custom VPN Tunnel (No Template)'. Navigation buttons at the bottom are '< Back', 'Next >', and 'Cancel'.

The screenshot shows the 'Authentication' step of the VPN Creation Wizard. The progress bar at the top shows 'VPN Setup' as completed and 'Authentication' as the current step. The title is 'vpn a central : Site to Site - FortiGate'. The 'Remote Gateway' field contains 'ip pública equipo remoto'. The 'Outgoing Interface' dropdown is set to 'WAN 1'. The 'Authentication Method' has 'Pre-shared Key' selected. The 'Pre-shared Key' field contains a masked key '.....' with a cursor at the end. The 'Hide Characters' checkbox is checked. Navigation buttons at the bottom are '< Back', 'Next >', and 'Cancel'.
