

Auto Registration

Para crear unas acciones de autoregistro vamos a **Configuration→Actions** y en el desplegable de la derecha **event source** seleccionamos **Auto Registration** y pulsamos el botón **create action**

En la primera pestaña de **Action** rellenaremos el nombre que queramos darle a esta acción y en el campo **New condition** creamos la condición “Host Metadata like Linux” y pulsaremos al enlace azul **Add** que está en el recuadro de new condition.

no pulsar el botón Add, hasta haber añadido primero las condiciones

The screenshot shows the Zabbix web interface for configuring Actions. The top navigation bar includes Monitoring, Inventory, Reports, Configuration, and Administration. The left sidebar shows Host groups, Templates, Hosts, Maintenance, Actions, Event correlation, Discovery, and Services. The main content area is titled 'Actions' and has two tabs: 'Action' and 'Operations'. The 'Action' tab is active, showing a form for creating a new action. The 'Name' field is empty. The 'Conditions' section shows a table with columns 'Label', 'Name', and 'Action'. Below this, the 'New condition' section has a dropdown menu set to 'Host metadata', a second dropdown set to 'like', and an empty text field. An 'Add' link is visible below the text field. The 'Enabled' checkbox is checked. At the bottom, there are 'Add' and 'Cancel' buttons. The second screenshot shows the same form after the condition 'Host metadata like Linux' has been added to the table, with the 'Add' link now highlighted in blue.
