

Auto Registration

Para crear unas acciones de autoregistro vamos a **Configuration→Actions** y en el desplegable de la derecha **event source** seleccionamos **Auto Registration** y pulsamos el botón **create action**

En la primera pestaña de **Action** rellenaremos el nombre que queremos darle a esta acción y en el campo **New condition**

creamos la condición “Host Metadata like Linux” y pulsaremos al enlace azul “ **Add** que está en el recuadro de new condition.

no pulsar el botón Add, hasta haber añadido primero las condiciones

Pulsamos ahora sobre la pestaña **Operations** y añadimos una nueva operación que nos vincule con la plantilla “Os Windows”

The screenshot shows the Zabbix web interface for configuring an action. The top navigation bar includes 'ZABBIX' and menu items: 'Monitoring', 'Inventory', 'Reports', 'Configuration', and 'Administration'. Below this is a secondary navigation bar with 'Host groups', 'Templates', 'Hosts', 'Maintenance', 'Actions', 'Event correlation', 'Discovery', and 'Services'. The main content area is titled 'Actions' and has two tabs: 'Action' and 'Operations'. The 'Operations' tab is active. The form contains the following fields:

- Default subject:** A text input field containing 'Auto registration: {HOST.HOST}'.
- Default message:** A text area containing 'Host name: {HOST.HOST}', 'Host IP: {HOST.IP}', and 'Agent port: {HOST.PORT}'.
- Operations:** A section with two tabs: 'Details' (selected) and 'Action'.
- Operation details:**
 - Operation type:** A dropdown menu set to 'Link to template'.
 - Templates:** A search box containing 'Template OS Linux' with a close button (✕) and a 'Select' button. Below the search box is the text 'type here to search'.
 - Buttons:** 'Add' and 'Cancel' buttons are located at the bottom left. A mouse cursor is pointing at the 'Add' button.

Ahora si, pulsamos el botón de **Add** para grabar la acción
