

[template, plantilla, zabbix, crear](#)

Creación de plantillas en Zabbix

En este caso vamos a crear una plantilla con una serie de **items** y **triggers** para monitorizar una SAI Libert APM 150. Para ello en la pestaña Configuration→Templates y pulsamos en el botón **Create Template**

Le ponemos un nombre, si pertenece a un grupo y el host al que estará asociada

Crear Item

Lo siguiente será crear un item para nuestra plantilla, para ello pulsamos dentro de dicha plantilla en la opción items y al botón que aparece en la parte superior derecha **Create Item**

The screenshot shows the Zabbix web interface with the title bar "ZABBIX Monitoring Inventory Reports Configuration Administration". Below the title bar, there is a navigation menu with links: Host groups, Templates, Hosts, Maintenance, Actions, Event correlation, Discovery, Services, and a "Create item" button. The main content area is titled "Items" and shows a search bar with the path "All templates / Plantilla Líder APM/50 Applications Items". There are several filter options: Host group (dropdown), Host (dropdown set to "Plantilla Líder APM/50"), Application (dropdown), Name (text input), Key (text input), Type (dropdown set to "all"), Update interval (text input), Type of information (dropdown set to "all"), History (text input), Status (dropdown set to "all"), Trends (text input), Triggers (dropdown set to "all"), and Template (dropdown set to "all"). Below the filters is a "Filter" dropdown and two buttons: "Apply" and "Reset". A note below the filters says "Subfilter affects only filtered data". Below the filters is a table header with columns: Wizard, Name, Triggers, Key, Interval, History, Trends, Type, Applications, and Status. The table body is empty and displays the message "No data found." At the bottom of the table are buttons: "0 selected", "Enable", "Disable", "Clear history", "Copy", "Mass update", and "Delete". A status bar at the bottom right says "Displaying 0 of 0 found".
