

Instalación de parches en VMWARE

Hay varias formas de instalar los parches, desde el vcenter, desde la consola, mediante scripts etc

Mediante VMWARE Vsphere Host Update Utility

Esta pequeña herramienta vienen junto con la instalación del cliente de Vmware Vshpere. Instalamos el cliente de vmware vsphere. Una vez instalado nos aparece en el inicio→todos lo programas→vmware→vsphere host update utility 4.0

Desde este programa podemos añadir host y ver que parches le faltan así como hacer un upgrade de un host. Para este último caso, nos situamos sobre el equipo a actualizar y pulsamos el botón **upgrade Host**.

Nos pide un fichero zip que descargamos de

<http://www.vmware.com/download/download.do?downloadGroup=ESXi40> o bien de
<https://www.vmware.com/tryvmware/p/activate.php?p=free-esxi>

Es importante hacer copia y parar todas las MV. Después poner el host en modo mantenimiento y proceder con el upgrade

Sin vcenter

http://www.vm-help.com/esx40i/ESXi40_upgrade_without_virtualcenter.php

por scripts

<http://communities.vmware.com/thread/75797>
<http://communities.vmware.com/message/1261992>
<http://www.petri.co.il/update-vmware-esx-esxupdate.htm>

Instalación de parches mediante VMTSPatchManager

Este método sólo se usa para actualizar versiones de ESX muy viejas
